"Zen feels like an emissary from the future, a time when many more people are at home with a wider scope of consciousness."

~ Dr. Robert Gilman—Founder,
Context Institute, Planetary Midwife

Orphaned at birth and adopted six weeks later, Zen Benefiel's lifelong search for connection and meaning took a transformative turn at age 18 while studying pre-Med, when a profound near-death experience became the catalyst for decades of exploration into consciousness, leadership, systems thinking, and human potential. Across more than 50 books, six years as host of *One World in a New World*, and as Founder of the Planetary Citizens nonprofit, he has steadily evolved from exploring individual transformation to developing practical frameworks for organizational and societal coherence.

Today, through Planetary Citizens and as Co-architect of the AI Universal Engine™, Zen works to intentionally foster harmony among people and planet by uniting human wisdom with deterministic AI for coherent decision-making.

Planetary Citizens—Awakening the Heart of Humanity Review:

It is a spiritual vision and one that is essential if the human race is going to join the community of spacefaring civilizations. The author, Zen Benefiel is a worthy successor to the work of the legendary Donald Keys.

~ Dr. Jeffrey Mishlove, Host, New Thinking Allowed
